Science - Winter

In Science we have been learning about the different seasons.

Complete the seasons quiz below to see how much you can remember about the seasons! (click to check your answers)

1. How many seasons are there?

2. Which season comes before summer?

3. Which is the coldest season?

4. Which season do trees lose their leaves in?

Let's join in with our seasons song!

Have a look at these pictures.
What season do you think they show?

If you have time

You might enjoy watching this video that shows lots of signs of winter. Talk with a grown-up at home about what you see.

The season now is winter.

Lots of changes happen in winter.

The weather turns colder. Sometimes it is cold enough for water to freeze as ice and it might even snow!

Cold weather means that people have to wear warm clothes like big coats and hats and gloves. We turn on our heating or have log fires to keep warm in our homes.

Animals in winter

The cold weather means that animals have to keep warm too and it can be harder for them to find food.

Some animals, such as hedgehogs and mice, sleep through the winter. This is called **hibernation**.

Some birds fly away to warmer countries. This is called **migration**.

In winter it is harder for animals to find food so some animals will have got ready for winter by storing food. At Burlington the squirrels will have been busy in autumn burying nuts. People often put out food for birds in winter.

Trees in winter

In winter some trees lose their leaves. These are the **deciduous** trees.

Some trees keep their leaves all year round. These are **evergreen** trees.

Let's go on a winter walk!

If you are able to go out for a walk (as part of your daily exercise), have a look for the signs of winter we have been learning about.

What do you need to put on before you go outside?

Come for a walk around school by watching this video (remember to be logged in using your year 1 google account to watch it).

Activities

You should:

Make a checklist of signs of winter. You could draw pictures or write the signs of winter we have just learned about. Tick those that you have spotted on your winter walk.

A rectangular checklist form titled "My Winter Walk Checklist" in the top right corner. The form is framed by a decorative border of small red birds. The border consists of 18 birds: 7 along the top edge, 7 along the right edge, 7 along the bottom edge, and 1 along the left edge. The central area of the form is blank, intended for a child to write or draw.

You also could:

Draw and write about a winter activity (building a snowman or playing in the snow) and explain what clothes you need. Or draw and write about what happens to animals in winter.

A rectangular form for drawing and writing about a winter activity. It features a decorative border of small snowmen. The border consists of 18 snowmen: 7 along the top edge, 7 along the right edge, 7 along the bottom edge, and 1 along the left edge. The central area of the form contains ten horizontal lines for writing, with a small blank space at the bottom for drawing.
